

STEP 3: INSTALL THE SMALLER HINGE PIECE

The small hinge piece will attach to the keyboard at the point indicated with the arrow. After step 2, do not flip the hinge piece over. Attach the end with the red dot.

You may need to use your tool to get the hinge piece under the clip as shown in the next picture. When you are done with this step, the hinge piece will lay flat on the board, around the rubber cup, and hooked under the metal clip.
